U. S. NAVAL BASE GUAM INSTRUCTION 5092.1A

From: Commanding Officer, U.S. Naval Base Guam

Subj: UTILIZATION OF HISTORICAL SPANISH STEPS SITE ONBOARD U.S. NAVAL
BASE GUAM

Ref: (a) DoD Instruction 1342.22, 05AUG2021
(b) SECNAVINST 1754.1B Department of the Navy Family Support Programs
(c) OPNAVINST 1754.1B Fleet and Family Support Center (FFSC) Program
(d) OPNAVINST 1740.3D Command Sponsor and Indoctrination Programs
(e) JTREGMARIANASNOTE 1620

Encl: (1) Operational Risk Management (ORM) Worksheet
(2) Command Duty Officer (CDO) Checklist
(3) Spanish Steps Safety Brief & Requirements
(4) Hiking Safety Guide
(5) Beach Safety Guide

1. Purpose. To promulgate policy, procedures, and information regulating command access to the historical Spanish Steps site on Naval Base Guam (NBG) in accordance with references (a) through (e). The primary responsibility and reservations will be held by Morale, Welfare and Recreation (MWR) Guam.

2. Cancellation. NAVBASEGUAMINST 5092.

3. Responsibilities.

a. NBG Installation Commanding Officer (ICO)

(1) Establish program policy for command utilization of Spanish Steps.

(2) Provide program guidance and ensure safety is promulgated.

b. MWR/Installation Safety Officer

(1) MWR Process reservation requests from commands for unit hikes.

(2) MWR publish access schedule to Command Duty Officer (CDO) as required.

23 Jan 2023

(3) MWR Monitor weather and other environmental conditions for hazards. MWR Installation Program Director (IPD) cancel planned events or close access to Spanish Steps as needed.

(4) Installation Safety Officer monitors “mission requirements” and close access to Spanish Steps as needed. Conduct annual inspection of Spanish Steps and enter report into ESAMS.

c. CDO

(1) Serves as the primary point of contact for tracking active hikes and will liaise with MWR and Installation Safety to ensure authorization to access Spanish Steps has been approved.

(2) Track access to Spanish Steps by using reservation schedule and CDO checklist.

d. Requesting Command/Organization for Unit Hikes

(1) Command is defined as military or supporting federal or educational agency having access to U.S. Naval Base Guam, including all Joint Region Marianas tenant commands and visiting units.

(2) Ensure all personnel are briefed as per reference (e).

(3) Ensure Operational Risk Management (ORM) is properly completed and submitted to their Commanding Officer (CO) for approval (O-5 or senior). No “By-Direction” will approve ORMs, only the CO. Other supporting federal or educational agency must have the ORM approved by the agency head or director.

(4) Hikes may be canceled/rescheduled due to inclement weather, mission requirements or other unforeseen events with short notice.

(5) Contact MWR to submit ORM approval forms and schedule hike no later than three (3) days in advance of hike. Call Sumay Cove Marina at (671) 969-1826 or email: MWR.SumayCoveMarina@gmail.com or visit MWR office at building 1985. Unit hikes will normally be scheduled Monday through Wednesday from 0700-1500.

a. Unit Hikes will consist of:

1. No one under the age of eighteen (18) years of age.

2. Only one group of three (3) to fifteen (15) hikers per day.

(6) NBG CDO shall be contacted no later than 1 hour prior to entering, and immediately after exiting Spanish Steps, contact number: (671) 488-7147. Ensure communication capability with CDO is maintained at all times.

(7) Remove all litter from the trail and trail head.

(8) Assume all risks and hazards associated with the Spanish Steps trail and lagoon.

(9) Ensure that members will not climb Spanish Steps as an individual, but as a group or unit/ organizational activity.

(10) Ensure all members remain in the authorized area and do not enter unauthorized or off-limit areas.

(11) Ensure all requirements of the Spanish Steps ORM, Safety Brief & Requirements are adhered to by all participants.

e. Requesting MWR Guided Hikes

(1) Ensure all personnel are briefed as per reference (e).

(2) Hikes may be canceled/rescheduled due to inclement weather, mission requirements or other unforeseen events with short notice.

(3) Contact MWR to schedule reservations for planned hike no later than three (3) days in advance of hike. Call Sumay Cove Marina at: (671) 969-1826 or email: MWR.SumayCoveMarina@gmail.com or visit MWR at building 1985.

a. MWR Guided Hikes will consist of:

1. No one under thirteen (13) years of age.

2. Cost is \$15 per adult and \$10 per teenager (13-17).

3. Only two (2) hikes per day, no less than five (5), and no more than thirty (30) participants per hike, 0830-1100 and 1330-1600.

4. Check-in 30 minutes prior at Sumay Cove Marina, building 1985.

Participants who lack the proper attire or equipment, will not be allowed to participate and no refund shall be given.

(4) NBG CDO shall be contacted no later than 1 hour prior to entering, and immediately after exiting Spanish Steps, contact number: (671) 488-7147. Ensure communication capability with CDO is maintained at all times.

(5) Remove all litter from the trail and trail head.

(6) Assume all risks and hazards associated with the Spanish Steps trail and lagoon.

(7) Ensure that members will not climb Spanish Steps as an individual, but as a group or unit/ organizational activity.

(8) Ensure all members remain in the authorized area and do not enter unauthorized or off-limit areas.

(9) Ensure all requirements of the Spanish Steps ORM, Safety Brief & Requirements are adhered to by all participants.

4. Rescheduling. MWR will notify command/hikers to reschedule when Spanish Steps is closed due to inclement weather, mission requirements or other unforeseen events.

5. Records Management. Records created as a result of this instruction, regardless of media and format, must be managed per Secretary of the Navy Manual 5210.1 of January 2012.

6. Review and Effective Date. Per OPNAVINST 5215.17A, the Installation Safety Office will review this instruction annually on the anniversary of its effective date to ensure applicability, currency, and consistency with Federal, DoD, SECNAV, and Navy policy and statutory authority using OPNAV5215/40 Review of Instruction. This instruction will automatically expire 5 years after effective date unless reissued or canceled prior to the 5-year anniversary date, or an extension has been granted.

M. D. LUCKETT

Releasability and Distribution:

This instruction is cleared for public release and is available electronically only via CNIC G2 Portal at <https://g2.cnic.navy.mil/NAVBASEGUAM/Pages/default.aspx>.

* Reference NAVBASEGUAMINST 5092.1A.

* Notifications - Commands to contact the CDO at (671) 488-7147 when starting/finishing a hike.

* Emergencies - Contact Regional Dispatch Center at: (671) 333-4357.

Spanish Steps Safety Brief & Requirements

*The beach to the right is off limits due to sea turtle nesting (see above picture).

1. Notifications:

- a. Contact safety office two days prior to event at (671) 339-7233.
- b. Contact the Command Duty Officer (CDO) at (671) 488-7147 when starting your hike and when finished with your hike. Communications will be maintained with CDO at all times while on Spanish Steps.

2. Emergencies:

- a. For emergencies, contact Regional Dispatch Center at: (671) 333-4357.

3. Safety support lines or ropes:

- a. The trail to Spanish Steps is steep and slippery when wet, exercise caution when utilizing the trail and hand lines.
- b. Use the dry treated rope and two (2) safety support lines (for descent and ascent) along the path at each side.

4. Trails:

Spanish Steps Safety Brief & Requirements

- a. Report any debris, obstacles, or impalement hazards such as dead branches, roots, large loose rocks, jagged edged trees and coconut leaves to the CDO, if they cannot be easily/safely removed by the unit.
 - b. Do not leave the trail or disturb the wildlife.
5. Beach and Water Hazards:
- a. At the bottom of the Spanish Steps, a pristine remote beach is surrounded by a lush sandy beach with paradise blue waters which holds beneath are strong currents as you draw closer towards the reef. The type of water currents are described below.
 - i. Long Shore Current. An ocean current which moves parallel to the shore that can form at any beach at is exposed to breaking surf caused by large swells sweeping into the shoreline at an angle that pushes water down the length of the beach in one direction. These currents can sweep swimmers and surfers into rip currents, coral rocks, and the reef.
If caught in a long shore current, do your best to regain your footing, remain calm, yell for help, face your feet in direction of travel, and swim perpendicular to the current to the shore.
 - ii. Rip Current. Caused by waves pushing water towards the shore, which in turn flows back to the ocean floor through a narrow channel. The rip current can move in a speed up to five (5) miles per hour. These currents have a waves break called the “Kill Zone”. The waves on a Kill Zone, can slam you on top of the reef or suck you underneath the surface. Waves breaks at the top and water tucks under the reef creating a washing machine effect.
If caught in a rip current, the best thing to do is concentrate on being afloat, yell for help, and ride out the rip current, until it dissipates. Once in calm water, await rescue or swim to shore only if there is a safe passage.
 - iii. Under Current. A flow of water that moves below the surface of the ocean. Similar to the long shore and rip current, only this current is under the surface.
If you feel an undercurrent, stay close to the surface and swim towards the shore. If you are on the beach and see someone caught in a current, call for help from a lifeguard or call 911. Don’t immediately dive in and swim to the person. It’s too risky, and you yourself may get caught in the rip current. Seek professional assistance from Search and Rescue Guam including Guam Fire Department, U.S. Coast Guard, Naval Base Guam Harbor Patrol, and Helicopter Sea Combat Squadron.
 - b. Be cautious of aquatic life, sea urchins, jelly fish, stone fish and other marine life which arrives on water by seasons.
 - i. Use sturdy water shoes to easily grip the sea floor and prevents foot injuries

Spanish Steps Safety Brief & Requirements

- ii. Use a long swim pants and rash guard to prevent cuts or bites from fishes or stings. from sea urchins or jelly fish.
- iii. Be cognizant of the lined buoy or floating water fence along reef line which prohibits swimmers from entering hazardous rip current areas as a swim warning marker.

6. Recommended Personal Protective Equipment:

- a. Gloves for hand protection for hiking.
- b. Sturdy boots or shoes descending and ascending hike.
- c. Hat or cap for sun protection.
- d. Personal Flotation Device (PFD) when swimming.
- e. Whistle as a form of communication while out swimming for emergencies.
- f. Recommended hikers refrain from carrying equipment weighing more than twenty (20) percent of their body weight and ensure ample supply of drinking water.
- g. Mobile phones as a form of communication for emergencies, as well as, contact with the CDO.

7. Unexploded Ordnance (UXO)

Do not touch any UXO as it may be very unstable. If you find a UXO, Regional Dispatch Center at: (671) 333-4357.

8. Historical and Cultural Artifacts

If you find any historical or cultural artifacts, do not touch or disturb the item(s). Call Public Works Department; Historical and report them at: (671) 339-2093.

For more information please contact the Installation Safety Office at (671) 339-7233.

Safety Tips

(Not An All Inclusive List)

Guam's hiking activities can pose significant hazards. Always be alert and cautious. Please adhere to the safety tips below for hiking activities:

- Stay updated on the weather forecast
- Two (2) person concept for any activity
- Tell someone where you are going and what time you plan on returning
- Stay hydrated and well nourished and pack extra supplies just in case of an emergency
- Protect your skin from the sun's ultraviolet rays
- Bring a cellular phone but understand some areas might not have reception
- Read posted caution or warning signs
- Do not participate in any activity under the influence of alcohol or medication that causes drowsiness
- Have the right gear for the event
- Be aware of poisonous animals or plants

Understanding Limitations

Guam's hiking activities are considered a high-risk activity and all military personnel are required to discuss with their supervisors their plans prior to engaging in the activity. JTREG Marianas Notice 1620 Identifies Off Limits locations, Restricted Water Activities, and High Risk Activities on Guam.

Hiking Safety Guide

Please contact U.S. Naval Base Guam Safety Office at 339-SAFE (7233) for more information on Hiking Safety.

Additional Information

- OPNAV M-5100.23
- OPNAVINST 5100.25C
- JTREG Marianas Notice 1620

Emergency Contacts

- Region Dispatch Center:
671-333-4357
- NBG CDO: 671-488-7147

Caves

As you prepare for your hiking

activity, please take the following, not all inclusive, items: water, insect repellent, food/snacks, knife, flashlight, rope, cell phone, whistle, good shoes, and a friend. Unless you are familiar and aware of the hazards in the area, it is recommended that you stay out of the caves on Guam. If it's your first time to explore caves, schedule with a reputable guide who knows the area and environmental hazards. Additionally, caves are not well lit, so bring a flashlight and be mindful the ground inside the cave may likely be slick with moss or mold and the rocks may be sharp. Ensure you are wearing proper footwear and take your time walking in and around the caves.

Unexploded Ordnance (UXO)

To date, UXOs can still be found throughout the island and laying dormant. UXOs include hand grenades, land mines, bombs, bullets, antipersonnel mines, and rockets. Over time, these UXOs tend to blend in with the environment and can be hard to detect. If you find a UXO, do not touch it as it may be very unstable. If you find a UXO, call

911.

Projectile

Grenade

Grenade

Grenade

Some grenades look like a soup can or a rock covered in the ground.

Wild Life & Insects

During your hike, you may encounter deer, feral pigs, frogs, brown tree snakes,

mice, bats, monitor lizards and coconut crabs. The coconut crab

when played with can amputate fingers if the claws happen to get a firm grip on you.

The calipers will need to be separated at the joint to release the claws or you can

try tickling the bottom of the crab's stomach to release the claws. While hiking, you may also

encounter several varieties of spiders, wasps, centipedes, and other harmful insects. If stung by an insect seek medical attention if pain persists.

Beach Safety Guide

Please contact U.S. Naval Base Guam Safety Office at 339-SAFE (7233) for more information on Beach or Hiking Safety.

Safety Tips

Guam's water activities can pose significant hazards. Always remain alert and cautious. Please adhere to the safety tips below for water activities:

- Use a Personal Flotation Device (PFD) and take swimming lessons
- Wear water shoes that cover the entire foot and have thick soles to protect your feet from hot surfaces and sharp objects.
- Stay updated on the weather forecast
- Two (2) person concept for any activity
- Tell someone where you are going and what time you plan on returning
- Stay hydrated and well nourished and pack extra just in case of an emergency
- Protect your skin from the sun's ultraviolet rays
- Bring a cellular phone but understand some areas might not have reception
- Read posted caution or warning signs
- Do not participate in any activity under the influence of alcohol or medications which causes drowsiness
- Have the right gear for the activity
- Be aware of poisonous animals or plants
- Avoid touching UXO's
- Contact MWR for activities you might be interested in and participating.

Risk Assessment Code

Operational Risk Assessments are conducted for beach safety hazard awareness and corrective actions. The below Risk Assessment Matrix is used to assign the risk levels associated with the beach hazards.

| RISK ASSESSMENT MATRIX | | PROBABILITY | | | | |
|---|---|---|--|---|---|--|
| | | Frequency of Occurrence Over Time | | | | |
| | | A Frequent (Continuously Experienced) | B Likely (Will occur frequently) | C Occasional (Will occur several times) | D Seldom (Unlikely, can be expected to occur) | E Unlikely (Improbable, but possible to occur) |
| Severity of Hazard | Catastrophic (Death, Loss of Asset, Mission Capability or Unit Readiness) | I EH 1 | EH 1 | H 2 | H 2 | M 3 |
| | Critical (Severe Injury or Damage, Significantly Degraded Mission Capability or Unit Readiness) | II EH 1 | H 2 | H 2 | M 3 | L 4 |
| | Moderate (Minor Injury or Damage, Degraded Mission Capability or Unit Readiness) | III H 2 | M 3 | M 3 | L 4 | L 4 |
| | Negligible (Minimal Injury or Damage, Little or No Impact to Mission Readiness or Unit Readiness) | IV M 3 | L 4 | L 4 | L 4 | L 4 |
| Risk Assessment Levels | | | | | | |
| EH=Extremely High 1 H=High 2 M=Medium 3 L=Low 4 | | | | | | |

Prohibited Water Activities

The JTREG Marianas Notice 1620 notifies all military personnel on Guam and in the Commonwealth of Northern Mariana Islands of the off-limits locations, other prohibitions, and restrictions.

- Cliff diving
- Water entry at Pagat Shore and Sharks Hole
- Hiking near rivers or outlets and waterfalls during or after heavy rain
- Cave diving or underwater spelunking
- Swimming in the vicinity of breakwater
- Reef walking
- Non-Recreational diving below 130 feet and wreck diving unless appropriately certified and equipped
- Limited swimming areas in CNMI

Rip Currents

A Rip Current is a powerful, channel current that can pull you away from the shore. This water hazard has resulted in severe injuries and drownings. If caught in a Rip Current, please follow the below safety tips:

- Remain calm and don't fight the current
- Swim parallel to the shore
- Be aware of your surroundings
- Shout and wave for help if you cannot escape

Guam Beach Map

NAVBASEGUAMINST 5092.1A 23 Jan 2023 Marine Life

Guam has many marine life hazards. Please be cautious while swimming.

Cone Snails. Cone snails are usually found under rocks and coral or crawling along the sandy bottom. The snail's shell is most often symmetrical in a spiral coil with one or two pairs of tentacles. The cone snail has a highly developed venom apparatus that can puncture through your clothing. The sting has a burning sensation which can spread throughout your body and may be severe. Please seek medical attention if needed.

Lionfish or Stonefish. They are shallow-water bottom dwellers. The sting of either fish can produce excruciating pain, along with local tissue destruction. Symptoms can also include respiratory failure and cardiovascular collapse. Please seek immediate medical attention if you got stung.

Box Jellyfish and Portuguese Man-O-War. Found on or below the surface of the water and washed ashore. Sting can be painful and possibly fatal. Apply vinegar and isopropyl alcohol and please seek medical attention if needed.

General Marine Life Safety:

- Wear water shoes while in the ocean
- Don't reach into holes or crevices to touch the marine life
- Do not put sea shells in your pocket
- Do not eat marine life you are unfamiliar with
